**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 21-60, drawn to a method of fitting a club to a player, classified in class 473, subclass 409.
  - II. Claims 61-84, drawn to golf club, classified in class 473, subclass 324.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of a golf club and a method of fitting a club to a player are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process as fitting a club to a player without replacing the head but replacing the entire club.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: Each group consists of species.

a. If Group 1 claims (Claims 21-60) are elected the following species are claimed.

i. Species 1 (varying the thickness): Claims 43-52.

j. Species 2 (insert weight): Claims 53-60.

b. If Group 2 claims (Claims 61-84) are elected the following species are claimed.

i. Species 1 (variable thickness): Claims 61-73.

j. Species 2 (insert weight): Claims 74-84.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for the group of claims elected for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Only group I claims currently have generic claims (Claims 21-42).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was not made to Mr. Gregory O. Garmong on 10 October 2003 to request an oral election to the above restriction requirement due to the complexity of the restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
